

Khant Kyaw Lin

Full-Stack Web Developer

PERSONAL PROFILE

A pragmatic **Full-Stack Developer** and final-year medical student dedicated to building simple, useful, and secure digital tools that solve real-world problems. With commercial and hands-on experience in **PHP, Laravel, JavaScript, React, and modern web architectures**, I focus on turning complex business workflows into clean, scalable platforms.

SKILLS & EXPERTISE

Frontend Technologies:

JavaScript (ES6+), React 19, Vite, Vue.js, HTML5, CSS3, Tailwind CSS v4, Bootstrap (TypeScript & Next.js certified)

Backend & APIs:

PHP 8+, Laravel 11, Node.js, RESTful APIs, WebSockets (Reverb), JWT & RBAC Middleware

Database & Storage:

MySQL, PostgreSQL, Firebase

DevOps & Tools:

Git & GitHub CI/CD, Linux, Postman, Vite, Vercel

LANGUAGES

English (Fluent), Burmese (Native)

WORK EXPERIENCE

Full-Stack Developer | Central_Nex Software House

Dec 2025 – Present

Core backend developer in a 2-person engineering team for a commercial Enterprise Supply Chain Financing (SCF) platform (Laravel 11, PHP 8+, MySQL, Flutter, WebSockets, Git CI/CD). Built primary backend business logic, multi-stage Maker-Checker workflows, concurrency-safe limit validations, and handled end-to-end API testing across DEV, SIT, and UAT environments.

Full-Stack Developer | Freelance

2025 – Present

Developed and launched custom full-stack web apps, PHP/Laravel backend services, and responsive frontend portals for small business clients.

Software Development Intern | Soft Guide Software House

May 2025 – Jul 2025

Collaborated on real-world projects including an E-learning platform and a Pharmacy Management System using Laravel, MySQL, and REST APIs.

Founder & Operations Lead | Vital Care Pharmacy

2022 – 2025

Founded and ran a retail pharmacy independently for 3 years, managing customer service, supplier orders, and over 1,000 medicine items. Solving these everyday operational problems firsthand inspired me to build custom pharmacy management and ERP software.

Academic Study Guide | Self-employed

2014 – Present

Mentored high school and medical students in complex scientific and medical coursework, fostering strong diagnostic and analytical thinking.

CORE COMPETENCIES

Domain Expertise: B2B FinTech & Supply Chain Financing, HealthTech & Clinical Systems Architecture

System Architecture: State Machine & Role-Based Workflows, High-Concurrency Database Design, Real-Time Event Broadcasting

Engineering Lifecycle: End-to-End Feature Delivery, Multi-Environment Release Management, Secure Authentication & RBAC Implementation

KEY PROJECTS

Enterprise Supply Chain Financing (SCF) Platform (Laravel 11, MySQL, Flutter, WebSockets)

Engineered core backend domain logic for a commercial B2B invoice financing platform. Built multi-tier Maker-Checker governance state machines (Entry, Amend, Resend, Approve, Reject, Reversal, Close) with pre/post-mutation audit trails and atomic rollbacks. Implemented concurrency-safe limit validations and real-time WebSocket broadcasting (Laravel Reverb).

VitalCare – Pharmacy Management & ERP System (React & Laravel)

Developed a full-stack system with a React frontend and Laravel API. Built secure RESTful endpoints, JWT authentication, and RBAC middleware to automate inventory, sales, and reporting. [\[Live Demo ↗\]](#)

Synapse Study – Medical Education Platform (React 19 & Tailwind v4)

Built a high-performance medical learning platform with interactive 3D flashcards, clinical summary dashboards, 5-choice practice exams with auto-submit countdown timers, and 1-click certificate exports. Powered by a custom Node.js dataset ingestion pipeline. [\[Live Demo ↗\]](#)

Learning Management System (Flutter & Firebase)

Implemented Firebase Analytics for user engagement tracking and dynamic content delivery in a live mobile application.

EDUCATION JOURNEY

Bachelor of Medicine, Bachelor of Surgery (M.B., B.S.) | University of Medicine 2, Yangon

2014 – Present (Final Year • Expected Completion: Nov 2026)

Undergoing rigorous clinical medical training developing deep diagnostic, analytical, and high-pressure problem-solving capabilities.

Advanced Diploma in Computing | NCC Education

2025 – 2026

Advanced studies in software engineering, database design, network architecture, and object-oriented programming.

Diploma in Computing | NCC Education

2024 – 2025

Core computing fundamentals covering web design, programming foundations, and system architecture.

PROFESSIONAL CERTIFICATIONS

Complete React v9 – Frontend Masters

Next.js Fundamentals v4 – Frontend Masters

React and TypeScript v3 – Frontend Masters

Intermediate React v6 – Frontend Masters

Complete Intro to Web Dev v3 – Frontend Masters

HTML, CSS & JS Essentials – Cisco

Introduction to Linux (LFS101) – Linux Foundation

Network Technician Career Path – Cisco

Vue & Firebase Combo – Creative Coders

Git & GitHub Intermediate – Creative Coders

PHP Internship Course – Soft Guide

AI Fundamentals – IBM SkillsBuild
